

**THE  
TOOLBOX**

## THE TOOLBOX FEATURES

The “How-to Guides” are a part of The Toolbox, created by 11th Hour Racing Team for the benefit of the wider community to make sustainability accessible for any organization - no matter the size of your organization or industry sector.

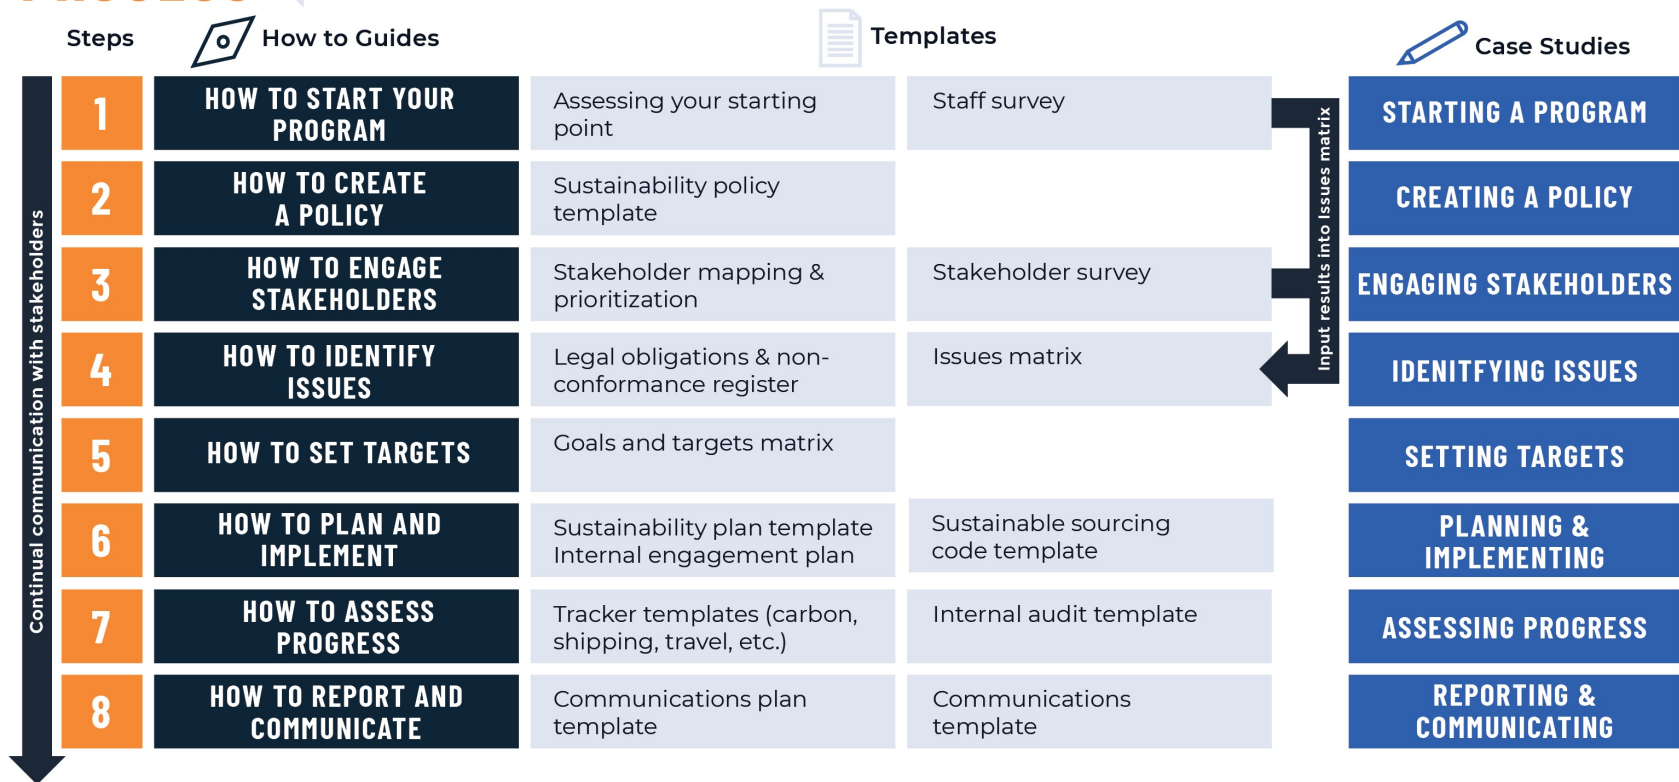

The Quick Guides provide a summarized version of the “How-to Guides” found in the The Toolbox - a suite of guides, templates and case studies to help organizations establish a sustainability program.

While the guides are laid out in a step-by-step process, each step is inherently cyclical and continuous stakeholder engagement is fundamental at every stage.

# PROCESS

# TESTIMONIALS

***"Really positive experiences with the Toolbox, great to have a centralised space for all this knowledge."*** Geert Hendriks, Sport and Sustainability International

***"The Toolbox is a phenomenal piece of work and incredibly useful."*** Ingrid Beutler, The Shift Project

***"This has been a great effort and these assets will no doubt be extremely helpful to the industry. Thank you for your time, passion and due diligence!"*** Jill Savery, 11th Hour Racing

***"The IMOCA Class and the Toolbox workshops allowed us to start thinking holistically about sustainability whilst running a global sailing campaign. We are currently critiquing our 2020 Vendée Globe campaign and now looking forward to how we can adapt and adopt new sustainability concepts as we plan the next steps for our project"*** Pip Hare Ocean Racing

***"We are really looking forward to sharing The Toolbox with our athletes as another tool to help drive sustainability in our league. It's been great being part of the pilot program and helping shape a great set of resources that will really add value and help people get on the journey for a better planet."*** Dr. Susie Tomson, Sustainability Consultant, SailGP

***"The Toolbox that the 11th Hour Racing Team have produced is a fantastic resource for organisations to quantify their environmental impact as well as create a robust environment strategy. The Toolbox caters for organisations just starting to measure their impact to more advanced CO2 reporting. The first step in reducing an organisations environmental impact is to quantify it and this suite of resources gives the user advice and the confidence to do this. Filled with examples, the Toolbox will be useful for sailing organisations as well as other sports organisations and I encourage people to use it."*** Dan Reading, World Sailing
