

CREATING A SUSTAINABILITY STRATEGY FOR YOUR ORGANIZATION

The Toolbox is a **free** suite of guides, tools, and templates housed within an eight-step process to help organizations create a comprehensive sustainability program.

The Toolbox's mission is to make creating a sustainability strategy accessible to all.

We recognize that as organizations realize the importance of the sustainable transition, it can be daunting to know where to start and how to tackle the complexity of the challenge. Our framework provides organizations with resources and a step-by-step roadmap to integrate sustainability practices into your operations.

Since launching in 2021, The Toolbox now has:

600+
MEMBERS

50+
FREE
RESOURCES

A community
across over
100
COUNTRIES

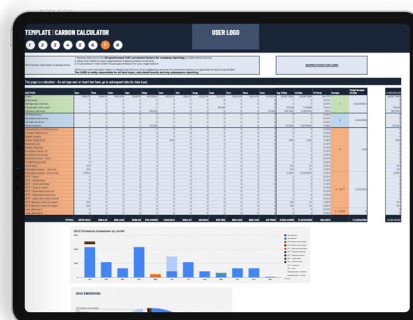

Working
in over
75
SECTORS

4
LANGUAGES
English, French,
Spanish, & Portuguese

The process takes your organization from realizing the need to change, to communicating with stakeholders, designing initiatives, to reporting successes and challenges.

The tools and templates will allow your organization to evaluate your environmental impact, resource consumption, and social responsibility.

Case studies and our knowledge-sharing community enable our members to discuss, learn, integrate learnings and share examples of best practices with the tools.

“The Toolbox is fantastic for any organization looking to develop a thorough program, ensuring that sustainability is well integrated into their organization.”

Bina Indelicato, Founding Partner at Ecoevolution

Assess the starting point of your organization to get a clear understanding of current practices, identify areas for improvement, and establish a baseline for progress.

1

Create a sustainability policy which sets your organization's direction and commitment to sustainability, guides decision-making, and defines action.

2

Engage stakeholders in a conversation, foster collaboration on initiatives going forward, ensuring their perspectives are considered, gain insights and build support for your sustainability efforts.

3

Identify issues and impacts in your operations. Prioritize actions and allocate resources where you can make the most significant positive impact.

4

Set SMART goals and targets to provide a clear direction for measurable progress, ensuring that your strategy remains focused and effective.

5

Make an action plan and implement initiatives to address your identified issues, allowing you to focus on targeted projects that drive positive change.

6

Track progress and ensure your strategy stays on course. Measure performance, identify successes and areas for improvement.

7

Report and communicate successes and learnings which are essential to inspiring others, engaging stakeholders, and contributing to broader systemic change.

8

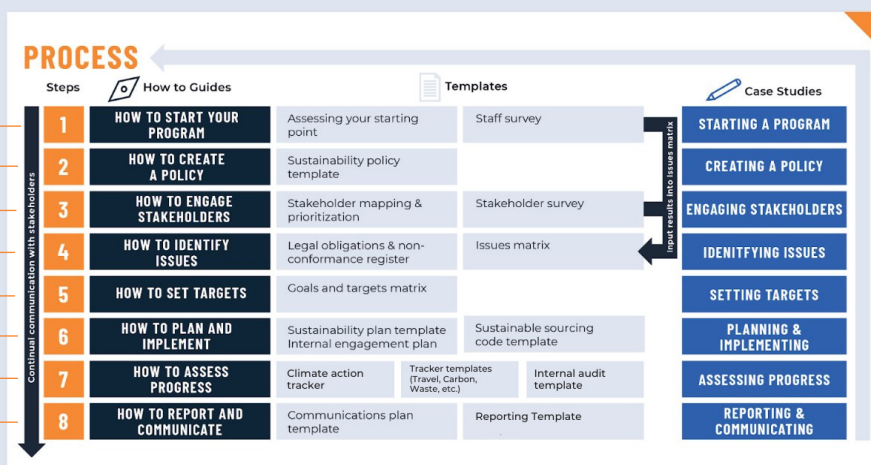

The Toolbox guides you through the process of assessing your current sustainability practices and developing a robust plan for improvement.

By following these eight steps, our holistic approach will enable your organization to make a comprehensive and effective sustainability strategy, making meaningful and lasting positive impacts on the environment, society, and its own long-term success.

As a small team with few resources, The Toolbox offered a very easy way forward. We were drawn to using these tools because they were simple and straight to the point. The process was really accessible to myself and the team.

The Toolbox, created by 11th Hour Racing Team, is built on the Creative Commons ethos that 'when we share, everyone wins'. Our Creative Commons license backs this core belief and underpins the knowledge-sharing foundation of The Toolbox community. Sharing resources and case studies enables all community members to participate in pursuing a fair and sustainable future.
